DETAILED ACTION

1. Applicants' election of species in the response filed 9/22/2003 is acknowledged. Following search of the elected species, the requirement for election of species is withdrawn, and the remaining species are joined for examination.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) Independent claims 1, 7 and 21 (and all claims dependent thereon) all contain the limitations "macromonomer" and "macroinitiator" without further limitation as to the intended scope of these components. The specification broadly defines "macroinitiator"

Art Unit: 1713

as “an oligomer, polymer or other large molecule which is capable of initiating a polymerization process” (see pg. 5). Similarly, “macromonomer” is defined as “oligomers, polymers or other large molecules comprising at least one functional group suitable for further polymerization” (see pg. 6). However, there is nothing which indicates applicants’ intended meaning regarding “large”. Furthermore, it cannot be determined whether “large” in “other large molecule” applies to the “polymers” and “oligomers” recited. For example, 1-hexene is the smallest oligomer of ethylene, and although it appears to be technically within the meaning of “oligomer”, such species cannot be considered “large”. In sum, the specification is of such broad and vague breadth as to these terms that the intended scope of the claims cannot be determined.

b) In independent claim 23 (and all claims dependent thereon) it cannot be determined whether the phrase “graft (co)polymer segments” are any type of segments on the graft copolymer, or whether the grafted segments are themselves copolymers.

c) Claim 38 (and all claims dependent thereon) is indefinite because the intended scope of “controlled” cannot be determined. All polymerization processes are to some extent “controlled”, but the aspect of control intended in these claims cannot be determined.

The breadth of the independent claims represents an enormous array of species, and therefore a properly focused search and application of prior art cannot be made until the above-mentioned issues are clarified.
